Purpose and Directions

This worksheet gives you practice analyzing medical terms by identifying word roots, combining forms, prefixes, and suffixes. Complete each section using clear clinical language. Submit the completed worksheet in Canvas as an uploaded file or by typing your answers into the assignment text box.

Section A: Word Part Review

Match each word part with its meaning. Write the correct letter on the line.

#	Word Part	Answer	Meaning
1	hyper-		A. inflammation
2	cardi/o		B. surgical repair
3	-itis		C. blood
4	brady-		D. above or excessive
5	-ectomy		E. heart
6	hemat/o		F. slow
7	gastr/o		G. under or below
8	hypo-		H. stomach
9	-plasty		I. pain
10	-algia		J. surgical removal

Section B: Break Down the Term

For each term, separate the prefix, root/combining form, and suffix. Then define the term in your own words.

Medical Term	Prefix	Root / Combining Form	Suffix	Definition
gastritis				
cardiology				
hematology				
subcutaneous				
prenatal				
tachycardia				
hypoglycemia				
arthroplasty				

Section C: Build the Medical Term

Use the word parts provided to build the correct medical term. Then write a short definition.

#	Word Parts / Meaning	Medical Term	Definition
1	heart + study of		
2	stomach + inflammation		
3	slow + heart condition		
4	blood + condition		
5	joint + surgical repair		
6	before + birth		

Section D: Clinical Application

Read the brief note below. Identify five medical terms or word parts, break them down, and explain the meaning in patient-friendly language.

Clinical note: The patient reports epigastric pain and intermittent tachycardia. The provider discussed possible gastritis and ordered hematology testing. The patient was advised to report worsening symptoms before the follow-up appointment.
