

PN101 Medical Terminology

Cardiopulmonary and Hematology Case

Student Name:		Date:	
Due Date:	September 1, 2026	Points:	15

Purpose and Directions

Apply cardiovascular, respiratory, blood, and lymphatic terminology to a patient case.

Complete all sections. Submit the completed worksheet in Canvas as an uploaded file or type your answers directly into the Canvas text box.

Case Scenario

A patient presents with dyspnea, tachycardia, fatigue, and pallor. The provider orders a CBC and discusses possible anemia and cardiopulmonary follow-up.

Section A: Decode Case Terms

Break down each term and explain its clinical meaning.

Term	System	Word-Part Breakdown	Meaning
dyspnea			
tachycardia			
fatigue			
pallor			
CBC			
anemia			
cardiopulmonary			

Section B: System Connections

Explain how each body system may relate to the case.

System	Relevant Terms	Connection to Patient Symptoms
Cardiovascular		
Respiratory		

System	Relevant Terms	Connection to Patient Symptoms
Blood / hematology		
Lymphatic / immune		

Section C: Patient-Friendly Explanation

Write a brief explanation of why the provider may order blood testing for fatigue, pallor, and shortness of breath.

Grading Checklist

- ☐ Term decoding: 7 points
- ☐ System connections: 5 points
- ☐ Patient explanation: 3 points
