

Chapter 1

The Evolution of Nursing

Lesson 1.1: The History and Evolution of Nursing

1. Describe the evolution of nursing and nursing education from early civilization to the 20th century.
2. Identify the major leaders of nursing history in America.
3. Discuss the significant changes in nursing in the 21st century.
4. Discuss societal influences on nursing.
5. Identify the major organizations in nursing.
6. Define the three purposes of the National Association for Practical Nurse Education and Service (NAPNES) and the National Federation of Licensed Practical Nurses (NFLPN).

The History of Nursing and Nursing Education

● Factors that have changed nursing

- How we care for the sick
- The relationship of people with their environment
- The search for knowledge and truth through education
- Increasing recognition of value of preventative care
- Technological advances

Care of the Sick During Early Civilization

- Evolution of concepts of health, wellness, and illness
- Ancient practices

Nursing Education in the Nineteenth Century

● Hospitals

➤ Overcrowded

- Poor hygienic practices

➤ Untrained people

- Women of “proper upbringing” did not work
- Inmates or prostitutes ended up serving as nurses

Florence Nightingale

- Known as “Lady with the Lamp”
- Credited as the first nursing theorist
- Helped to shift the views of nursing education
 - Established nursing school at Saint Thomas Hospital in London
 - Promoted new standards of nursing
 - “Nightingale Plan” established

Major American Nursing Leaders

- Dorothea Dix
- Clara Barton
- Mary Ann Ball
- Linda Richards
- Isabel Hampton Robb
- Lavinia Dock
- Mary Eliza Mahoney
- Lillian D. Wald
- Mary Adelaide Nutting
- Mary Breckenridge

Changes in Nursing During the Twentieth Century

● **Licensing of Nursing**

- First states to mandate licensure
- National League for Nursing (NLN)

● **Impact on nursing**

- World War I
- World War II

● **Contemporary nursing**

- American Nurses Association (ANA)

Significant Changes in Nursing During the Twenty-First Century

- Demographic changes
- Women's health care issues
- Men in nursing
- Minority nurses
- Human rights
- Medically underserved
- Nursing shortage

Development of Practical and Vocational Nursing

- Attendant nurses—3 months education
- Between 1948 and 1954, sharp increase in practical and vocational nursing programs
- Federal funds helped recruitment of men and women

Organizational Influence

- National Federation of Licensed Practical Nurses (NFLPN)
 - Founded by Lillian Kuster in 1949
 - Membership limited to LPN/LVNs
- National League for Nursing (NLN)
 - In 1961, established the Department of Practical Nursing Programs
 - Developed an accreditation service for these programs, which today is called the Council of Practical Nursing Programs.

Contemporary Practical and Vocational Nursing Education

- Types of practical nursing programs offered for LPN/LVNs
 - Programs must meet minimum state standards
 - Length 12-18 months
- Articulation agreements

Factors that Influenced Practical and Vocational Nursing

- Need for trained caregivers
- World War I
- The self-taught practical nurse
- Duties of LPN/LVNs
- Position paper of the American Nurses Association

Licensure for Practical and Vocational Nursing

- Licensure laws

- Protect the public from unqualified practitioners
- Managed by state agencies such as the state board of nursing

- National Council Licensure Examination for Practical Nurses (NCLEX-PN)

- Exam successfully completed awards licensure for the state

Lesson 1.2: The Health Care System and Nursing

7. Identify the components of the health care system.
8. Describe the complex factors involved in the delivery of patient care.
9. Identify the participants in the health care system.
10. Define practical and vocational nursing.
11. Describe the purpose, role, and responsibilities of the practical and the vocational nurse.

Health Care Delivery Systems

● Health Care System Defined

- Complete network of agencies, facilities, and providers involved within a specified geographic area
- Goal to achieve optimal levels of health care for a defined population

Wellness-Illness Continuum

1. Range of a person's total health
2. Each individual's position is ever-changing
3. Wellness versus illness
4. Holistic health care

Maslow's Model of Health and Illness

● Maslow's model

- Physiologic
- Safety and security
- Love and belongingness
- Esteem
- Self-actualization

Health Promotion and Illness Prevention

- Today three organized levels of health promotion are
 - Maintain wellness
 - Preventing disease-related complications
 - Reducing infirmity associated with disease states

Continuity of Care

- Patient is the focus in health care
- One of the greatest challenges is artful navigation of the health care delivery system

Delivery of Patient Care

- Involves determining patient's individual needs
- Developing a plan of care
 - Meeting the needs of the patient

Participants in the Health Care System

- Professional health care specialist
- Registered nurses (RNs)
- Licensed practical/vocational nurses
- Other caregivers
- Technologists, medical technicians, and paraprofessionals

Economic Factors Affecting Health and Illness

- Rising health care costs
- Increasing number of aging Americans
- Advances in technology
- Health care insurance
- Malpractice insurance
- Changes in delivery system

Social and Environmental Factors that Affect Health and Illness

- Financial hardships
- Lifestyle choices
- Social pressures
- Personal behavior

Health Promotion

- Most people in the United States have a right to health care without discrimination
- Includes treatment of disease, health promotion, preventive medicine
- Patient rights
- Health care providers' rights

Interdisciplinary Approach to Health Care

- Development of comprehensive care plan
- Effective communication
- Accurate documentation

Nursing Care Models

- Have changed to meet the needs of the patient
- Four major concepts
 - Nursing—encompasses the roles and actions of the nurse
 - Patient—the individual receiving the care
 - Health—the area along the wellness-illness continuum that the patient occupies
 - Environment—the setting for the nurse-patient interaction

Contemporary Practical and Vocational Nursing Care

- The role of the LPN/LVN has expanded over time
- Influenced by
 - Nurse practice act depending on the state
 - Changes within health care agencies
 - Availability of workers
 - Needs of the patients

Practical and Vocational Nurse Defined

- LPN/LVN provides direct services under supervision of a registered nurse (RN)
- Performs basic therapeutic, rehabilitative, and preventive care
- Provides care in all types of settings

Roles and Responsibilities

- NAPNES issues statement of responsibilities for practice as an LPN/LVN
- Plan care/revise plan of care based on nursing diagnoses
- Demonstrate a caring and empathic approach to safe care
- Implement patient care under the direct supervision of registered nurse, licensed physician, or dentist
