

Admission, Transfer, and Discharge

PN 102 • Chapter 11 • Foundations of Nursing, 9th ed. • pp. 262–279

Chapter 11: four ideas to connect

Admission

Verify identity, collect key information, protect belongings, and orient the patient to safety.

Transfer

Communicate needs, medications, risks, and pending care as responsibility changes.

Discharge teaching

Use clear language and teach-back for medications, follow-up, warnings, and resources.

Continuity

Document accurately and communicate unresolved needs so the next caregiver can continue safely.

Put the chapter into safe practical nursing care

Transitions are safe only when essential information travels with the patient.

Confirm identity and destination, protect belongings and equipment, and give a focused handoff. Before discharge, reinforce the plan and use teach-back to identify misunderstandings.

- ✓ Verify patient and destination
- ✓ Protect belongings and equipment
- ✓ Give a focused handoff
- ✓ Reinforce the care plan
- ✓ Confirm with teach-back

RECOGNIZE → ACT → REPORT

**Verify the move.
Transfer the facts.
Confirm the plan.**

Before moving on, explain the cue, your immediate action within scope, and the facts you would report.
